

INTERNATIONAL SYMPOSIUM ON POLYMER ANALYSIS AND CHARACTERIZATION

23 – 27 June 2025

Nanyang Technological University, Singapore

Dear colleagues,

We are pleased to announce that the annual 36th International Symposium on Polymer Analysis and Characterization will be held from 23 – 27 June 2025 at NTU Singapore. We are now inviting scientific contributions for the conference.

Analytical chemists and polymer scientists from academia, industry, and government agencies – both local and international – are welcomed to join the 5-day event dedicated to sharing valuable insights into various aspects of polymer analysis, characterization techniques and their applications. The program includes a 2-day intensive school, followed by a 3-day conference, providing an ideal platform for learning, networking and collaboration.

We encourage you to submit abstracts for oral and poster presentations and share this announcement with any colleagues who may be interested. The session topics will include:

- Challenges and opportunities in polymer characterization through traditional and AI approaches
- Advancing polymers for a sustainable future (including environmental and green manufacturing)
- Polymer for personal care, healthcare and emerging food applications
- Polymer and composites for industrial applications
- Novel polymers in emerging applications

Abstract submission deadline is 1 March 2025

Acceptance of abstracts will be given on 15 March 2025

For abstract submission instructions and more information, please visit the conference website (<http://www.ispac-conferences.org>)

All attendees are invited to submit contributions to the *International Journal of Polymer Analysis and Characterization*, following the journal guidelines. Submitted articles which are peer reviewed, recommended and accepted, will appear in regular issues of IJPAC with a remark that the contribution has been presented at ISPAAC 2025 in Singapore. Please visit the *IJPAC* website for details.
